Education

Graphic Era Hill University — Dehradun
Computer Application Bachelor — 2022 - 2025
CGPA: 7.74

Graphic Era University — Dehradun
Computer Application Master
CGPA: 7.64

Skills

Programming Languages:	C++, Java, C#, Python, JavaScript, HTML, CSS
Libraries/Frameworks:	React, Node Js, BootStrap, Langchain
Tools / Platforms:	Git, Git hub, Docker
Databases:	MongoDB, SQL

Projects / Open-Source

KisanMart — *MERN*

* Direct Farmer-to-Consumer Marketplace: A direct-to-consumer (D2C) agricultural e-commerce platform designed to bridge the gap between organic farmers and urban buyers.
* Elimination of Middlemen: Cuts out multi-tier
brokers, wholesalers, and retail markups, allowing farmers to earn higher profit margins while buyers get fresher produce at fair prices.
* Produce Listing & Management: Tools to add, update, and manage inventory with unit pricing (per kg, piece, bundle), stock limits, and harvest schedules.
* Direct Price Control: Empowers growers to establish their own pricing based on yield quality and operational costs without market manipulation.

OfflineUPI — *Java SpringBoot*

* Data-Independent Digital Transactions: A secure payment protocol enabling users to execute instant peer-to-peer (P2P) and peer-to-merchant (P2M) UPI transactions in zero-connectivity or low-network environments.
* Financial & Digital Inclusion: Designed for rural areas, underground transit, crowded events, and remote regions where mobile internet (4G/5G) is unreliable or unavailable.
* Store-and-Forward / Encrypted Signal Relay: Uses alternative offline channels (Encrypted SMS, Sound Waves, Bluetooth Mesh, or USSD) to validate credentials locally and sync transactions asynchronously with bank servers.
* Offline Wallet / Voucher Balance: Local, hardware-backed secure storage for pre-funded balances (similar to UPI LITE) for instant zero-latency processing.
* Proximity & Contactless Payments: Instant payment initiation via NFC tap, Encrypted QR codes, or ultrasonic sound-wave transmission.

Learning Managment System — *MERN*

* Multi-Vendor E-Learning Marketplace: A web application that functions like Udemy or Teachable, enabling independent instructors to register, create, and monetize digital courses.
* Revenue-Sharing Ecosystem: The platform operates on a split-payment or commission model where the platform owner takes a percentage cut on every course sale before disbursing profits to the instructor.
* Course Builder & Curriculum Manager: Drag-and-drop course creation interface to organize content into modules, video lessons, PDF resources, and quizzes.Video Upload & Transcoding: Seamless integration with cloud storage (Cloudinary / AWS S3) for chunked video uploading and processing. Dynamic Pricing & Coupon Generation: Tools to set course pricing (Free vs. Paid), create promotional discount codes, and offer bundled deals.

* Course Builder & Curriculum Manager: Drag-and-drop course creation interface to organize content into modules, video lessons, PDF resources, and quizzes.Video Upload & Transcoding: Seamless integration with cloud storage (Cloudinary / AWS S3) for chunked video uploading and processing. Dynamic
